**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT**

International application No. **PCT/EP 03/14244**

I. Basis of the report

1. With regard to the **elements** of the international application (*Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17)*):

Description, Pages

1-8 as originally filed

Claims, Numbers

1-18 as originally filed

Drawings, Sheets

1/2-2/2 as originally filed

2. With regard to the **language**, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item.

These elements were available or furnished to this Authority in the following language: , which is:

- ☐ the language of a translation furnished for the purposes of the international search (under Rule 23.1(b)).
☐ the language of publication of the international application (under Rule 48.3(b)).
☐ the language of a translation furnished for the purposes of international preliminary examination (under Rule 55.2 and/or 55.3).

3. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application; the international preliminary examination was carried out on the basis of the sequence listing:

- ☐ contained in the international application in written form.
☐ filed together with the international application in computer readable form.
☐ furnished subsequently to this Authority in written form.
☐ furnished subsequently to this Authority in computer readable form.
☐ The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.
☐ The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.

4. The amendments have resulted in the cancellation of:

- ☐ the description, pages:
☐ the claims, Nos.:
☐ the drawings, sheets:

EXAMINATION REPORT**

International application No. **PCT/EP 03/14244**

5. ☐ This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed (Rule 70.2(c)).

(Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.)

6. Additional observations, if necessary:

V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Yes: Claims	
	No: Claims	1-18
Inventive step (IS)	Yes: Claims	
	No: Claims	1-18
Industrial applicability (IA)	Yes: Claims	1-18
	No: Claims	

2. Citations and explanations

see separate sheet

Re Item V

1. Prior Art

Reference is made to the following documents D1 - D4:

- D1: EP-A-0 179 943 (FREUNT IND CO LTD) 7 May 1986 (1986-05-07)
- D2: US-A-3 491 953 (STEPHANOFF N N) 27 January 1970 (1970-01-27)
- D3: GB-A-1 253 067 (S. JOUFFROY) 10 November 1971 (1971-11-10)
- D4: EP-A-0 347 329 (BAZANTE G ;ABSI F) 20 December 1989 (1989-12-20)

2. Novelty (Article 33 (2) PCT)

The present application does not meet the requirements of Article 33 (2) PCT, because the subject matter of **claims 1 and 12** is not novel.

The document D1 is regarded as being the closest prior art and discloses (the references in parentheses applying to this document):
a process of applying a liquid to a finely milled solid, in which the liquid is applied to a solid that is to be finely milled is introduced into the milling zone of a fine milling device during the milling operation or simultaneously with the introduction of the solid to be finely milled, where the fine milling is carried out in the presence of the finely divided liquid;

as well as a device for carrying out that process comprising means for introducing, milling and discharging the material (see figures), and a device for metering the finely divided liquid into the milling zone during the fine milling or simultaneously with the introduction of the material for milling (see figures and relevant passages in the description).

Thus, D1 discloses all the features of independent claims 1 and 12, which therefore lack novelty.

The features of claims 1 and 12 are also known from D2 - D4 and lack therefore novelty in view of these documents.

The features of the **dependent claims** are either known from the documents cited in the International Search Report (see the cited claim relevances) for the same purpose as in the present application or lie within the general knowledge of the skilled person, therefore they are not new or they are not considered to involve an inventive step.
